

Item #: SCP-358-FI

Facility Classification: Secure Containment Site

Designation: "Site-19 of the North"

—

Special Containment Protocols:

Site-358-FI is located approximately 30 km northwest of Joensuu, Finland. The facility is surrounded by a double-perimeter security fence, each 5 m in height and topped with barbed wire. The interdicted zone between the fences is monitored by motion sensors and patrolled continuously by armed security personnel.

Access to Site-358-FI is restricted to authorized Foundation staff only. A single secure gate functions as the official entry and exit point. All personnel and vehicles are subject to biometric verification,

inspection, and clearance procedures in accordance with Foundation Regulation ██████-█.

The surrounding region is designated a restricted military training area by the Finnish government under Foundation cover authority. A permanent no-fly zone with a 5 km radius is enforced by the Finnish Air Force, and all civilian traffic is redirected through controlled routes.

—

Description:

Site-358-FI is a specialized SCP Foundation containment and research facility, established to house anomalous objects and entities requiring adaptation to colder climate conditions.

The facility comprises:

- **Cryogenics Division** (low-temperature containment and preservation).
- **Research Wings** (applied anomalous studies, xenobiology, memetics).
- **Containment Units** (reinforced cryo-cells, vacuum-sealed stasis chambers).
- **Security and Response Wing** (Rapid Response Team “Fenrir” detachment).
- **Administrative and Support Infrastructure** (command offices, medical, logistics, living quarters).

The remote location and northern climate provide environmental advantages for both containment and study of cold-affected SCP phenomena.

—

Staff Structure (Excerpt):

- **Site Director:** \[REDACTED]
- **Chief of Security:** Cmdr. ██████ ██████
- **Head Researcher, Cryogenics Division:** Dr. G. Helstein (Level 4 Clearance)
- **Medical Officer:** Dr. ██████ ██████
- **Containment Engineering Liaison:** Eng. ██████ ██████

All other personnel require minimum Level 2 clearance for assignment.

—

Addendum 358-1: Research Activity (Excerpt)

Site-358-FI has overseen the containment of several anomalous entities adapted to or producing extreme cold conditions. Notably:

* **SCP-358-FI-07:** \[DATA EXPUNGED], recovered from a frozen lakebed in Northern Karelia. Containment made possible through the facility’s cryo-sealed isolation chambers.

Research contributions from Site-358-FI have directly influenced containment protocols now applied across multiple Foundation installations.

—

Addendum 358-2: Security Notice

All data concerning specific SCPs contained at Site-358-FI is restricted to Level 4 personnel or higher. Unauthorized access attempts will result in immediate disciplinary review and potential reassignment to Class E personnel status.

Cooperation with Finnish governmental and military entities remains active under Protocol Borealis-12. All external communication is classified.
